SUMMARY

Entry-level IT candidate who is a self-motivated team player with a positive attitude. Capable of working in a fast-paced, demanding environment while adapting to changing priorities. Enjoy working both independently and within a diverse team of skilled and motivated co-workers to deliver quality results.

SKILLS

Technical Skills: Bootstrap, HTML, CSS, JavaScript, C, C++, Python, Next.js, React.js, Express.js, Node.js, Tailwind css, Oracle, Bootstrap, MongoDB, Microsoft Office, Jira, Figma

Others: Fluent in Korean, Standard first aid and CPR-C training, Registered member of the College of Early Childhood Educators of Ontario

PROJECTS

Museum Website
Developed a responsive user interface utilizing React, Next.js, and Bootstrap to interact with the Metropolitan Museum of Art Collection API. Implemented features such as Favorites and Search History using Jotai state management. Addressed data integrity and usability issues, including resolving invalid object IDs and improving navigation menu behavior for smaller devices.

Blog Website
Developed and deployed a dynamic web app using Handlebars view engine and PostgreSQL for data storage. Implemented user registration, login/logout functionality, and CRUD operations for blog posts. Enhanced security with hashed passwords using bcrypt.js. Integrated MongoDB for session management and activity tracking.

Retail Application Development
Created a simple Retail application using the C++ programming language and Oracle (PL/SQL).

Airline Reservation Database
Using Oracle DBMS, based on a sample airline reservation company's booking records and ticket informations, our team normalized user views, created the Entity Relationship Diagram and designed the database.
